QUICK REFERENCE · KEEP THIS BESIDE YOU

Power BI in One Page

Activity 1 · Build a Sales Dashboard

The 5 measures

```
Total Sales
= SUM(Sales[Sales])
Total Profit
= SUM(Sales[Profit])
Total Quantity
= SUM(Sales[Quantity])
Total Orders
= DISTINCTCOUNT(
    Sales[Order ID])
Profit Margin %
= DIVIDE(
    [Total Profit],
    [Total Sales])
```

One step further

```
Region Sales =
 CALCULATE([Total Sales],
  Sales[Region]="Metro Manila")
```

When you're done

1. Save your .pbix file.
2. Export a PDF or screenshot of the finished dashboard.
3. Submit as "Dashboard Activity 1" on the ExcelHelpline hub.
4. Use the same name + email you use across the whole course.

Build in this order

1. Get data → Excel → Sales sheet → Transform data
2. Check each column's data type → Close & Apply
3. Create the 5 measures (left)
4. Add the 4 KPI cards
5. Add the 4 charts (below)
6. Add 3 slicers: Date, Region, Category
7. Apply a theme, add titles, align → Save

Which chart?

Trend over time	Line — Sales by Month
Compare groups	Bar — Sales by Category
Part of a whole	Donut — Sales by Segment
Compare places	Map/bar — Sales by Region
See the detail	Table / matrix

Your dataset

KuboHome_Sales_Activity1.xlsx

Dimensions: Date, Region, City, Category, Product, Segment, Rep. Measures: Quantity, Unit Price, Sales, Cost, Profit.
